Race Field Fee (RFF) Trial: 1/1/2027 - 31/03/2027

Details of the Trial

- Tasracing has developed a model intended to be both effective and simple to administer for Tasracing and WSPs.
- Tasracing proposes that WSPs be provided with the option to opt-in to the trial, with RFF calculations applicable as follows under the trial for each WSP:
- WSPs receive a pro-rata 50% discount on calculable RFFs for every dollar of turnover achieved above their FY26 Q3 (1/1/26 to 31/3/26) actual turnover.
- Example – WSP achieves $1.5M turnover during the trial vs $1.0M FY26 Q3. $1.5M / $1.0M = 33% of calculable RFFs over the trial receives a 50% discount.
- If their calculated fee under the Standard Terms and Conditions period was $45,000 their discount will be $7,500 making their payable fee for the period $37,500.
- ***Discount = (Actual Turnover – Target Turnover)/Actual Turnover x 50% x Calculated RFF)***
- The discount will be calculated and rebated following the submission of the March return.
- To ensure simplicity, the target turnover for the three-month period is for each operator to have their turnover greater than the same period in 2026.
